- November 6, 1915.*—Beach at Fort Point. Leader, Prof. Setchell. Study of sea plants.

EXHIBITS

- May 14-15, 1915.*—Special exhibit of *Leguminosae*. Plants in season were shown in fresh bloom; those not in season were shown in herbarium specimens. All the genera native to California were represented, some of them in a goodly number of species. In addition, herbarium exhibits of several ecological formations were made by individual members.
- October 16-17, 1915.*—Exhibit of berries and berry-bearing shrubs. Separate sections were given to the native and the exotic species, and to scientific and artistic methods of arrangement and grouping. The exhibit proved to be one of the most attractive and popular that the Society had undertaken.
